

Liquid sinks with outstanding heat removal capability. Single and double sided sinks available. The sinks will hold 12 pieces 40mm x 40mm modules. The sinks are designed for liquid to contact all modules in parallel, thereby not compromising the DT to modules at the end of the flow channel. Whale fin® Patent Pending

Part # WHALEFIN12-40mmLIQUID

Feature:

- All Aluminum construction for the liquid sink
- 1/2" ID 5/8" OD barbed fittings for both in port & out port.
- Mate to a 1/2" ID silicon tube for best results with 3/16" wall thickness.
- Low flow low pressure drop design.
- Flow rates are 2 liters to 4 liters per minute with on slight back pressure
- Optimal flow rate is 2.5 liters per minute.
- All flow is in parallel **NO** serial flow.
- Up to 24 modules can be placed on a 3 deck design.

*TEG Modules
Electrically can be
wired in series or
parallel*

Populated with 12 pieces of 40 x 40mm recommended modules:

TEG1-12610-5.1

TEG1-12610-4.3
